

EXPLOSIVESSECURITY**SPECIALISTS**

www.magguardmonitoring.com

Mag Guard Monitoring (MGM) specializes in providing security solutions for the storage of energetic materials including explosive magazines and nuclear storage.

By integrating innovative new GPS (Global Positioning Satellite) & Satellite Communications technology, MGM provides its customers with an unparalleled 24/7 monitoring service. The MGM system on your magazine will check in twice a day providing you with its regular status reports so you do not have to attend the magazine daily to check its integrity, and it will provide immediate notification in the event of an unauthorized entry.

To see how a portion of our innovative new system works please visit the ["Security"](#) page for a simple diagrammatical process overview.

Our Vision

Our vision is to provide unparalleled security solutions for the storage of energetic materials on a global scale. Providing cost effective, 24/7 security for a multitude of industries around the world on a individual, corporate and federal level.

Future Expandability

Mag Guard Monitoring has developed this innovative security system to be infinitely expandable in the future. With possibilities of such things as asset tracking, inventory control, access control and remote site monitoring we will be working hard to utilize as much of the potential as required.

• Asset Tracking • Inventory Control • Access Control • Remote Site Monitoring
